### **DETAILED ACTION**

This is in reference to communication received 22 May 2008. Claims 4, 12 – 13, 15 – 16 and 22 are pending for examination.

### ***Drawings***

The drawing have been approved by the examiner

### ***Reason For Allowance***

The following is an examiner's statement of reasons for allowance:

Applicant's invention is for an automated system which manages plurality of contingency contracts wherein each contingent contract is between plurality of parties. For each of plurality of contingent contract, contingencies and parties involved in contingent contract including independent sources who will provide information with respect to a contingency are registered with system. When a milestone is reached, said automated system retrieves information from the independent source related to the contingency. After receiving the information from the independent source, applicant's invention determines if the contingent event has occurred from the retrieved information, determines if the contingency is resolved, or deadline for the milestone has passed and the contingency is not resolved, and notifies the plurality of parties associated with the contingent contract that the contingency agreement is determinate with respect to the

Art Unit: 3629

contingent event if determined that the contingency is resolved or that the milestone is the deadline.

### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Brian K. Lambert on 27 August 2008.

After the examiner's amendment, amended claims will read as follows:

#### **Claim 16:**

A computer program product for automatically managing a plurality of contingency agreements automated commerce management, said computer program product comprising a computer usable medium having computer readable executable program code thereon, said computer readable executable program code comprising:

~~computer-readable program~~ code for receiving a first contingency agreement of the plurality of contingency agreements, wherein the first contingency agreement is between a plurality of parties;

~~computer-readable program~~ code for identifying from the first contingency agreement a contingency to be resolved;

~~computer-readable program~~ code for determining a milestone for when a contingent event of the contingency is to occur;

~~computer-readable program~~ code for predetermining an independent source configured to provide information with respect to the occurrence of the contingent event;

~~computer-readable program~~ code for identifying when the milestone is reached;

~~computer-readable program~~ code for retrieving information related independent source when the milestone is reached;

~~computer-readable program~~ code for determining if the contingent event occurred from the retrieved information;

~~computer-readable program~~ code for determining if the contingency is resolved if determined that the contingent event occurred;

~~computer-readable program~~ code for determining if the milestone is a deadline for when the contingency is to be resolved if determined that the contingent event did not occur

~~computer-readable program~~ code for identifying the contingency agreement as determinate with respect to the contingent event if determined that the contingency is resolved or that the milestone is the deadline; and

~~computer-readable program~~ code for notifying the plurality of parties that the contingency agreement is determinate with respect to the contingent event if determined that the contingency is resolved or that the milestone is the deadline.

Prior teaches registering of contracts with the server, updating response for contingencies in a contract, workflow management for contingent contract, notifying involved parties with the updates to contingencies in the contract.
